

TREE I.V. Micro-Infusion™

Most versatile injection system available – effective for all tree types. Its closed system directly and safely infuses pest control, disease control, and nutritional products with reduced environmental exposure. High volume, low pressure, lightweight and easy to use. The Tree I.V. works with all mixable products. The Arborjet systems are the only tree injection systems using Arborplug technology to assure your treatment is fast, safe, and effective.

TREE I.V. 2-PACK KIT

High volume, low pressure, can be used with mixable products. A perfect starter kit.

DELUXE KIT

New for 2008, this kit now includes three Tree I.V. systems and one QUIK-jet System. For high and low dosage applications in all tree sizes and all tree types. Everything you need for high production use in one box!

Arborjet Tree I.V. system in use.

The Arborjet Tree I.V. is the most effective and versatile injection system available to treat your trees. Works for all deciduous and coniferous trees.

How Much Does it Cost to Treat a Tree?

- Medicament costs can be less than \$10 per tree.
- Nutrition costs as little as \$5 per tree.

How Long Does it Take to Treat with the Tree I.V.?

Approximately 10-30 seconds per caliper inch or 5 to 10 minutes per tree when treating multiple trees.

"Arborjet is by far the best equipment purchase I've ever made. It paid for itself in two jobs!"

~ Ryan Franks, Appalachian Tree Care
Asheville, North Carolina
